

Information note on installer training certification On Miller Permanent Anchorage Systems

Vierzon the 21st of March 2017

Dear Customer, Installer, Inspector

As installer/inspector you have been trained by our training centers or our engineers in order to install our products in a proper way by having received the latest product information.

You received a certificate allowing you to install and manage yearly inspection of the product that was specified with the certificate.

As we improve our products regularly, the norms and standards change, and we launch new products on the market, it is important that all certified installers are updated on our products by having regular trainings, or refreshed on existing products

It is important to remind you on important facts :

- The certificate can only be addressed to a named person being a part of your company
- The maximum validity period of the certificate is 3 years

In case you have old certificates not in line with the above information, they need to be renewed. For the people trained long before the period indicated above it is also recommended to complete a new training.

Then, please contact your local sales representative, or your local technical support :

Northern Europe :

Email: scs-hof@Honeywell.com

Phone number: +49 9281 8302 0

Southern Europe:

Email: lignedevie@Honeywell.com

Phone number: +33 248 53 08 97

With my best regards

Eric Bertot

Permanent Anchorage System Engineering Manager
